OVERVIEW

- We have reviewed BBVA-6 FTPYME's performance.
- Following our review, we have affirmed our rating on the class C notes.
- BBVA-6 FTPYME is a single-jurisdiction cash flow CLO transaction backed by an amortizing portfolio of SME loans. It closed in June 2007.

LONDON (S&P Global Ratings) July 26, 2018--S&P Global Ratings today affirmed its 'D (sf)' credit rating on BBVA-6 FTPYME Fondo de Titulizacion de Activos' class C notes.

We have used the latest available payment report and loan level data to perform our analysis and have applied our European small and midsize enterprise (SME) collateralized loan obligation (CLO) criteria and our current counterparty criteria (see "European SME CLO Methodology And Assumptions," published on Jan. 10, 2013, and "Counterparty Risk Framework Methodology And Assumptions," published on June 25, 2013). We have also applied our structured finance ratings above the sovereign (RAS) criteria (see "Ratings Above The Sovereign - Structured Finance: Methodology And Assumptions," published on Aug. 8, 2016).

Since our October 2016 review, the class B notes fully redeemed in June 2018 (see "Various Rating Actions Taken In Spanish SME CLO Transaction BBVA-6 FTPYME," published on Oct. 17, 2016). Therefore, the class C notes is the only

outstanding tranche. Due to the active deferral trigger since 2012, class C interest payments were junior to principal payments. Consequently, on the last payment date in June 2018, the class C notes have amortized by 1.90% of their initial amount (initial amount of €32.3 million) despite their deferred interest payments of €1.73 million still due. From the next payment date in September 2018, the class C notes' interest payments will be senior to principal payments.

The current performing portfolio balance is approximately €16.5 million, which represents a 1.1% pool factor. With only 131 distinct obligors, we consider the portfolio to be non-granular and concentrated with the top obligor and top five obligors representing 10.65% and 35.71% of the current performing balance, respectively. There is €35.5 million of defaulted loans in the portfolio.

Given that our ratings reflect timely interest payment and ultimate payment of principal and the status of the transaction in which (i) the portfolio is concentrated to 131 obligors only, (ii) the class C notes are undercollateralized, (iii) the class C notes have been deferring interest payments since 2012, and (iv) the reserve fund's depletion, we have affirmed our 'D (sf)' rating on this class of notes.

BBVA-6 FTPYME is a single-jurisdiction cash flow CLO transaction securitizing a portfolio of SME loans that Banco Bilbao Vizcaya Argentaria, S.A. originated in Spain. The transaction closed in June 2007.
