-- Bonds confirmed at A (high) (sf)

BBVA RMBS 16 FT:

-- Bonds confirmed at A (high) (sf)

Today's rating actions are based on the following analytical considerations as described more fully below:

- Portfolio performance, in terms of delinquencies and defaults and losses.
- Updated default, recovery and loss assumptions on the remaining receivables.
- Current available credit enhancement to the rated notes to cover the expected losses at their respective rating levels.
- Correction to a cash flow modelling error made at the previous rating action.

The downgrades on the Series B and Series C notes issued by BBVA RMBS 5 FTA and the Series B notes issued by BBVA RMBS 11 Fondo de Titulización de Activos reflect the correction of an error made in DBRS's cash flow analysis for each of the two transactions. At the time of the previous rating action on 2 June 2016, DBRS's ratings reflected the ability of the structure to pay the interest due for the aforementioned series on an ultimate basis which resulted in an upgrade for the BBVA RMBS 5 FTA Series B and Series C notes and a confirmation for the BBVA RMBS 11 Fondo de Titulización de Activos Series B notes. The current ratings now address the timely payment of interest and ultimate payment of principal by the legal final maturity date.
