

Rating Action: Moody's downgrades three Spanish RMBS in consideration of exposure to Banco de Valencia

Global Credit Research - 16 Dec 2011

Madrid, December 16, 2011 -- Moody's Investor Service has reviewed all transactions exposed to Banco de Valencia and has today downgraded the ratings of three senior tranches in three Spanish residential mortgage-backed securities (RMBS) transactions. Today's rating action follows the downgrade of Banco de Valencia to Ba1 in March 2011 and to Ba2 in October 2011. The rating action concludes the review for downgrade of these three tranches initiated by Moody's on March 2011.

A detailed list of the rating actions appears at the end of this press release.

RATINGS RATIONALE

Today's rating action reflects: (i) the lack of back-up servicer (BUS) in the transactions serviced by Banco de Valencia in order to support payments on the rated tranches in the event of servicer disruption, (ii) the increased commingling risk in the structures where Banco de Valencia acts as collections account bank, (iii) the failure of Banco de Valencia to find a replacement swap counterparty in two of the transactions.

--SERVICER DISRUPTION RISK

Banco de Valencia services 6 RMBS transactions rated by Moody's, 5 as sole servicer and one (Bancaja-BVA VPO 1) as part of a multi-servicer deal, 86% of the pool currently administered by former Bancaja (now Bankia Baa2/P-2 on Review for Possible Downgrade) and 14% by Banco de Valencia. In none of these transaction there is a back-up servicer in place.

Moody's has concluded that for the 5 RMBS transactions solely serviced by Banco de Valencia, the maximum achievable rating is A1(sf). Moody's has not taken action on Valencia Hipotecario 4 and 5 in which senior tranche ratings are rated A3(sf) and A2(sf) respectively. No action was taken on the multi-servicer deal Bancaja-BVA VPO 1 either given limited exposure to Banco de Valencia and available liquidity.

The downgrade takes into account the current level of liquidity in the transactions. An additional mitigant to payment disruption risk is the role of Europea de Titulización, the management company, that will coordinate the appointment of a replacement servicer if Banco de Valencia is not able to perform its duties. The management company also acts as an independent cash manager and will be able to use available funds, including the reserve fund, to support timely payments on the notes in case of a temporary servicer disruption.

Uncertainty mainly stems from the lack of a back-up servicer in these transactions. Banco de Valencia was intervened by Bank of Spain as of 21 November 2011. Although this helps mitigate servicer disruption in the short term, there is high uncertainty as of the future of the entity. If the rating of Banco de Valencia is downgraded further while no back-up agreement is in place, the ratings would be negatively affected.

--COMMINGLING RISK

Collections are transferred daily from Banco de Valencia to the treasury account held by a P-1 entity in all the deals. Moody's has assessed commingling risk in the transactions and concluded that the increased commingling risk following the downgrade of Banco de Valencia did not affect the ratings of the notes. This is due to the current available credit enhancement in the case of Valencia Hipotecario 1, 2, 3 and 4.

In the case of Valencia Hipotecario 5 and Bancaja-BVA VPO 1 there are dedicated commingling reserves in place.

Uncertainty mainly stems from the exposure to Banco de Valencia as the collection account bank. If the rating of Banco de Valencia is downgraded further, in absence of other mitigants to commingling risk, the ratings of the transactions concerned would be negatively affected

--SWAP COUNTERPARTY EXPOSURE

Moody's has assessed swap counterparty risk for two transactions for which Banco de Valencia continues to act as swap counterparty (Valencia Hipotecario 1 and 2). According to the transaction documents Banco de Valencia should have been replaced as basis swap counterparty or its obligations guaranteed by an eligible party at loss of its A3/P-2 ratings. Collateral is being weekly posted to the fund but no replacement has taken place as of today. This exposure was not the driver of today's rating action given the limited credit support provided by the swap (basis swap) and the level of credit enhancement present in the structure.

Uncertainty mainly stems from the exposure to Banco de Valencia as swap provider. If the rating of Banco de Valencia is downgraded further, in absence of a replacement to take over the role of swap provider, the ratings in the five transactions would be negatively affected.

As noted in Moody's comment 'Rising Severity of Euro Area Sovereign Crisis Threatens Credit Standing of All EU Sovereigns' (28 November 2011), the risk of sovereign defaults or the exit of countries from the Euro area is rising. As a result, Moody's could lower the maximum achievable rating for structured finance transactions in some countries, which could result in rating downgrades.

The principal methodology used in these ratings was "Moody's Approach to Rating RMBS in Europe, Middle East, and Africa," published in October 2009. Please see the Credit Policy page on www.moodys.com for a copy of this methodology.

Other Factors used in this rating are described in "Global Structured Finance Operational Risk Guidelines: Moody's Approach to Analyzing Performance Disruption Risk" published in June 2011.

In rating these transactions, Moody's used ABSROM to model the cash flows and determine the loss for each tranche. The cash flow model evaluates all default scenarios that are then weighted considering the probabilities of the lognormal distribution assumed for the portfolio default rate. In each default scenario, the corresponding loss for each class of notes is calculated given the incoming cash flows from the assets and the outgoing payments to third parties and note holders. Therefore, the expected loss for each tranche is the sum product of (i) the probability of occurrence of each default scenario; and (ii) the loss derived from the cash flow model in each default scenario for each tranche.

As such, Moody's analysis encompasses the assessment of stressed scenarios.

List of affected ratings:

Issuer: Valencia Hipotecario 1, FTA

...EUR 140.13M A Notes, Downgraded to A1 (sf); previously on March 25, 2011 Aaa (sf) Placed Under Review for Possible Downgrade

Issuer: Valencia Hipotecario 2, FTH

...EUR 415M A Notes, Downgraded to A1 (sf); previously on March 25, 2011 Aa1 (sf) Placed Under Review for Possible Downgrade

Issuer: Valencia Hipotecario 3, FTA

....EUR 503.38M A2 Notes, Downgraded to A1 (sf); previously on March 25, 2011 Aa1 (sf) Placed Under Review for Possible Downgrade

REGULATORY DISCLOSURES

For ratings issued on a program, series or category/class of debt, this announcement provides relevant regulatory disclosures in relation to each rating of a subsequently issued bond or note of the same series or category/class of debt or pursuant to a program for which the ratings are derived exclusively from existing ratings in accordance with Moody's rating practices. For ratings issued on a support provider, this announcement provides relevant regulatory disclosures in relation to the rating action on the support provider and in relation to each particular rating action for securities that derive their credit ratings from the support provider's credit rating. For provisional ratings, this announcement provides relevant regulatory disclosures in relation to the provisional rating assigned, and in relation to a definitive rating that may be assigned subsequent to the final issuance of the debt, in each case where the transaction structure and terms have not changed prior to the assignment of the definitive rating in a manner that would have affected the rating. For further information please see the ratings tab on the issuer/entity page for the respective issuer on www.moodys.com.

The ratings have been disclosed to the rated entities or their designated agent(s) and issued with no amendment resulting from that disclosure.

Information sources used to prepare each of the rating are the following: parties involved in the ratings, parties not involved in the ratings, public information, and confidential and proprietary Moody's Investors Service information.

Moody's did not receive or take into account a third-party assessment on the due diligence performed regarding the underlying assets or financial instruments related to the monitoring of these transactions in the past six months.

Moody's considers the quality of information available on the rated entities, obligations or credits satisfactory for the purposes of issuing a rating.

Moody's adopts all necessary measures so that the information it uses in assigning a rating is of sufficient quality and from sources Moody's considers to be reliable including, when appropriate, independent third-party sources. However, Moody's is not an auditor and cannot in every instance independently verify or validate information received in the rating process.

Moody's Investors Service may have provided Ancillary or Other Permissible Service(s) to the rated entity or its related third parties within the two years preceding the credit rating action. Please see the special report "Ancillary or other permissible services provided to entities rated by MIS's EU credit rating agencies" on the ratings disclosure page on our website www.moodys.com for further information.

Please see the ratings disclosure page on www.moodys.com for general disclosure on potential conflicts of interests.

Please see the ratings disclosure page on www.moodys.com for information on (A) MCO's major shareholders (above 5%) and for (B) further information regarding certain affiliations that may exist between directors of MCO and rated entities as well as (C) the names of entities that hold ratings from MIS that have also publicly reported to the SEC an ownership interest in MCO of more than 5%. A member of the board of directors of this rated entity may also be a member of the board of directors of a shareholder of Moody's Corporation; however, Moody's has not independently verified this matter.

Please see Moody's Rating Symbols and Definitions on the Rating Process page on www.moodys.com for further information on the meaning of each rating category and the definition of default and recovery.

Please see ratings tab on the issuer/entity page on www.moody's.com for the last rating action and the rating history.

The date on which some ratings were first released goes back to a time before Moody's ratings were fully digitized and accurate data may not be available. Consequently, Moody's provides a date that it believes is the most reliable and accurate based on the information that is available to it. Please see the ratings disclosure page on our website www.moody's.com for further information.

Please see www.moody's.com for any updates on changes to the lead rating analyst and to the Moody's legal entity that has issued the rating.
