Fitch Ratings-Madrid-04 August 2017: Fitch Ratings has revised the Outlook on 58 tranches of 36 Spanish structured finance (SF) transactions to Positive from Stable. A full list of affected tranches is available at www.fitchratings.com or by clicking this link.

KEY RATING DRIVERS

Sovereign Outlook

The Outlook revisions follow the revision of the Outlook on Spain to Positive from Stable and affirmation of the sovereign Issuer Default Rating (IDR) at 'BBB+' (see Fitch Revises Spain's Outlook to Positive; Affirms IDRs at 'BBB+' dated 21 July 2017 on www.fitchratings.com).

Fitch maintains a six-notch differential between the sovereign IDR and the highest achievable SF ratings. Therefore, the sovereign Outlook revision to Positive implies a maximum achievable rating for SF transactions in Spain of 'AA+sf/Positive'. This rating cap reflects the risk that sovereign weaknesses increase the likelihood of extreme macro-economic events that could undermine the performance of the securitisations.

Stable Performance and Adequate Counterparty

The Outlook revisions on 37 'AA+sf' rated tranches of 30 RMBS, ABS and SME transactions reflect Fitch's expectations of stable transaction performance, and robust credit enhancement that mitigate credit stresses compatible with the notes' ratings. These transactions also include counterparty arrangements compatible with Fitch's criteria expectations for 'AAAsf' category ratings, especially the inclusion of 'A'/F1' minimum counterparty eligibility triggers.

FADE Linked to Sovereign Rating

All 16 FADE bonds rated by Fitch are credit-linked to Spain's IDR as they benefit from an explicit and irrevocable guarantee from the government. The FADE programme is exposed to refinancing risk because the underlying electricity tariff deficit (TD) receivables are collected over approximately 15 years, while all FADE bonds have bullet maturities resulting in cash flow mismatches between assets and liabilities.

Utility Bonds Anchored to Sovereign Rating

The Outlook revisions on five electricity TD securitisations (Alectra Finance, Bliksem Funding, Delta Spark 2008-1 and Rayo Finance Series 3 & Series 4) reflect the one-notch rating uplift Fitch maintains on these transactions from the sovereign IDR, in line with the principles of Fitch's Portuguese and Spanish Utility Credit Rights Securitisation Rating Criteria. The rating uplift mainly reflects the assessment of electricity system key performance indicators, and the profile of the industry regulator, which does not have truly independent powers from the central government to set access tariffs.

RATING SENSITIVITIES

The ratings of the 37 'AA+sf' rated tranches are principally exposed to the sovereign and SF rating cap in Spain. Changes to the Spanish sovereign rating or Country Ceiling could affect the ratings of these tranches.

FADE bonds ratings' are credit-linked to Spain and a change in the sovereign rating would lead to the same change in the bonds' rating. Changes to the terms of the full and unconditional guarantee from the Spanish government could also impact the FADE bonds' ratings.

Alectra Finance, Bliksem Funding, Delta Spark and Rayo Finance 3 and 4 could be downgraded if regulatory uncertainties arise affecting the electricity system governance framework and its ability to implement corrective measures in times of stress. The transactions could be upgraded if the regulator independence is strengthened, for example in its ability to set access tariffs, all else being equal.

DATA ADEQUACY

Fitch has not conducted any checks on the consistency and plausibility of the information it has received about the performance of the asset pools and the transactions. Fitch has not reviewed the results of any third party assessment of the asset portfolio information or conducted a review of origination files as part of its ongoing monitoring.

Overall, Fitch's assessment of the information relied upon for the agency's rating analysis according to its applicable rating methodologies indicates that it is adequately reliable.

Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.
