Fitch Takes Various Actions on Bancaja Series Spanish RMBS Ratings

06 Aug 2010 10:08 AM (EDT)

Fitch Ratings-London-06 August 2010: Fitch Ratings has today upgraded one, downgraded four and affirmed 20 tranches from the Bancaja, Fondo de Titulizacion Hipotecarios y de Activos Series (Bancaja) Spanish RMBS transactions originated by Caja de Ahorros de Valencia, Castellon y Alicante. The agency has downgraded four tranches from the Bancaja 9 transaction that has experienced reserve fund draws at each of the last 8 interest payment dates due to deteriorating collateral performance. Fitch has also upgraded the Class B tranche in Bancaja 3, reflecting the strong collateral performance and deleveraging of this highly seasoned transaction. A full rating breakdown is provided at the end on this comment.

The performance of the early transactions in the Bancaja series has remained strong. The low weighted average loan to value ratios (LTV), in the range of 30%-60%, have contributed to the low level of arrears and defaults seen in these transactions, and also reduce the likelihood of losses, even given Fitch's expectations for a 25%-30% house price decline in Spain. The older transactions have also experienced defaults that have been spread out since closing, allowing the transactions to efficiently utilise excess spread without drawing on their reserve fund.

Bancaja 4-7 have switched to a pro-rata note amortisation, and Fitch expects this to also occur in Bancaja 3. Although pro-rata amortisation of the notes will accelerate note pay-down, along with an amortising reserve fund, it also limits credit enhancement growth. Fitch notes that the current credit enhancement levels provide sufficient support and therefore have affirmed all the ratings.

Although the sequential amortisation of the notes is having a positive impact on the credit enhancement growth in Bancaja 8 and 9, continued reserve fund draws have offset this positive trend. Given the current volume of loans within the higher delinquency buckets and the limited excess spread generated, the agency expects further draws in these two transactions which will limit the credit support the notes get from subordination. The current level of loans in arrears for more than three months have been high at 1.98% and 3.29%, respectively for Bancaja 8 FTA at the end of June and Bancaja 9 FTA as of the June 2010 interest payment date (IPD). This is in comparison to the older transactions within the series which have experienced 3M+ arrears in the range of 0.24%-0.80%.

Following the downgrade of Caja de Ahorros de Valencia, Castellon y Alicante (Bancaja) by Fitch from BBB+/F2 to BBB/F3 on 1 June 2010, the agency was informed that remedial actions were taken to mitigate the exposure to Bancaja. Bancaja is the Interest Rate Swap Counterparty for Bancaja 3 and 4 transactions. For further information on the remedial action please refer to Fitch's public commentary titled "No Impact on Bancaja and Banco de Valencia SF Deals from Downgrade", published on 3 August 2010.

The rating actions are as follows:

Bancaja 3, Fondo de Titulizacion de Activos:

Class A (ISIN ES0312882006): affirmed at 'AAA'; Outlook Stable; assigned a Loss Severity rating of 'LS-1'
