

Fitch Upgrades 7 Tranches of Hipocat RMBS; Affirms Others

Fitch Ratings-London-25 August 2017: Fitch Ratings has upgraded seven tranches of the Hipocat RMBS series and affirmed 20 tranches. A full list of rating actions is below.

The transactions consist of mortgages originated in Spain by Catalunya Banc S.A. (now part of BBVA Group; A-/Stable/F2), which previously traded as Caixa Catalunya.

KEY RATING DRIVERS

Improving Asset Performance

The Hipocat series continues to see fewer borrowers falling into early-stage arrears as the macroeconomic environment in Spain improves. As late stage arrears continue to roll through to default the transactions continue to report a decline in three months plus arrears.

As of end-May 2017 loans in arrears by more than 90 days stood at between 0.7% (Hipocat 6) and 1.9% (Hipocat 9), down from between 2.0% (Hipocat 7) and 4.0% (Hipocat 11) in June 2016. The volume of cumulative defaults currently ranges between 1.0% (Hipocat 6) and 24.7% (Hipocat 11) of the initial pool balance.

Fitch believes that asset performance is likely to continue improving across transactions, mainly driven by the high seasoning of the underlying portfolios, between 140 months (Hipocat 11) and 196 months (Hipocat 6), and stable macroeconomic conditions. This expectation is reflected in the affirmations.

The solid performance combined with growing credit enhancement led Fitch to upgrade the senior, B, and C notes of Hipocat 7 and the senior and B notes of Hipocat 9 and the class C note of Hipocat 8. Fitch has also assigned the highest rated notes in Hipocat 7 a Positive Outlook, in light of the revision of the Outlook on the Spanish sovereign to Positive.

Exposure to Payment Interruption Risk

Payment interruption risk is adequately covered in Hipocat 6 as the cash reserve is sufficient to pay senior expenses and interest due on the notes. The level of cash reserve for Hipocat 7 continues to replenish and is currently sufficient to pay senior expenses and interest due on the notes. However, the senior notes may be exposed to payment interruption risk if significant draws on the reserve fund take place, given there are no structural mitigants to cover for a disruption to the collection process.

In Hipocat 8-11, payment interruption risk is not mitigated as the cash reserves remain fully depleted. The notes exposed to payment interruption can achieve a maximum rating of 'A+sf', given BBVA's rating.

High Deficiency Ledgers

The principal deficiency ledgers (PDL) have reduced for Hipocat 8 to EUR10.6 million (as of June 2017) from EUR16.4 million (as of May 2016), for Hipocat 9 to EUR20.2 million from EUR22.8 million (as of June 2016), and for Hipocat 10 to EUR79.2 million from EUR82.3 million (as of June 2016). The PDL for Hipocat 11 has increased slightly to EUR138.6 million from EUR137.1 million (as of May 2016).

RATING SENSITIVITIES

The ratings on Hipocat 6 and 7's class A notes are sensitive to changes to Spain's Country Ceiling and, consequently, changes to the highest achievable rating for Spanish structured finance notes.

A worsening of the Spanish macroeconomic environment, especially employment conditions, or an abrupt shift in interest rates could jeopardise the ability of the underlying borrowers to meet their payment obligations.

USE OF THIRD-PARTY DUE DILIGENCE PURSUANT TO RULE 17G-10

No third party due diligence was provided or reviewed in relation to this rating action.

DATA ADEQUACY

Fitch has checked the consistency and plausibility of the information it has received about the performance of the asset pool and the transaction. There were no findings that were material to this analysis. Fitch has not reviewed the results of any third party assessment of the asset portfolio information or conducted a review of origination files as part of its ongoing monitoring.

Fitch did not undertake a review of the information provided about the underlying asset pools ahead of the transactions' initial closing. The subsequent performance of the transactions over the years is consistent with the agency's expectations given the operating environment and Fitch is therefore satisfied that the asset pool information relied upon for its initial rating analysis was adequately reliable.

Overall, Fitch's assessment of the information relied upon for the agency's rating analysis according to its applicable rating methodologies indicates that it is adequately reliable.

Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent).
