OVERVIEW

- We have reviewed BBVA Hipotecario 3 under our SME CLO criteria and our updated criteria for rating single-jurisdiction securitizations above the sovereign foreign currency rating.
- Following our review, we have taken various rating actions in the transaction.
- BBVA Hipotecario 3 is a single-jurisdiction cash flow CLO transaction backed by an amortizing portfolio of SME loans. It closed in June 2005.

LONDON (Standard & Poor's) Jan. 30, 2015--Standard & Poor's Ratings Services today affirmed its 'AA (sf)' credit rating on BBVA Hipotecario 3, Fondo de Titulizacion de Activos' class A2 notes. At the same time, we have raised to 'A+ (sf)' from 'BBB+ (sf)' and to 'BBB (sf)' from 'BB+ (sf)' our ratings on the class B and C notes, respectively (see list below).

Upon publishing our updated criteria for rating single-jurisdiction securitizations above the sovereign foreign currency rating (RAS criteria), we placed those ratings that could potentially be affected "under criteria observation" (see "EMEA Structured Finance, Covered Bond, And Multicedulas Ratings Placed Under Criteria Observation" and "Methodology And Assumptions For Ratings Above The Sovereign--Single-Jurisdiction Structured Finance," published on Sept. 18, 2014 and Sept. 19, 2014, respectively).

Following our review of this transaction, our ratings that could potentially be affected by the criteria are no longer under criteria observation.

We have used data from the December 2014 investor report to perform our analysis and have applied our European small and midsize enterprise (SME) collateralized loan obligation (CLO) criteria and our current counterparty criteria (see "European SME CLO Methodology And Assumptions," published on Jan. 10, 2013, and "Counterparty Risk Framework Methodology And Assumptions," published on June 25, 2013). We have also applied our RAS criteria.

BBVA Hipotecario 3 is a single-jurisdiction cash flow CLO transaction securitizing a portfolio of SME loans that Banco Bilbao Vizcaya Argentaria S.A. originated in Spain. The transaction closed in June 2005.

CREDIT ANALYSIS

We have applied our European SME CLO criteria to determine the scenario default rates (SDRs)--the minimum level of portfolio defaults that we expect each tranche to be able to withstand at a specific rating level using CDO Evaluator.

To determine the SDR, we adjusted the archetypical European SME average 'b+' credit quality to reflect the following factors: Country, originator, and portfolio selection.

We ranked the originator into the moderate category (see tables 1, 2, and 3 in our European SME CLO criteria). Taking into account Spain's Banking Industry Country Risk Assessment (BICRA) score of 5, we have applied a downward adjustment of one notch to the 'b+' archetypical average credit quality (see "Banking Industry Country Risk Assessment Update: January 2015," published on Jan. 12, 2015). Due to the absence of information on the creditworthiness of the securitized portfolio compared with the originator's entire loan book, we further adjusted the average credit quality by three notches (see table 4 in our European SME CLO criteria).

As a result of these adjustments, our average credit quality assessment of the portfolio was 'ccc', which we used to generate our 'AAA' SDR of 79.69%.

We have calculated the 'B' SDR, based primarily on our analysis of historical SME performance data and our projections of the transaction's future performance. We have reviewed the portfolio's historical default data, and assessed market developments, macroeconomic factors, changes in country risk, and the way these factors are likely to affect the loan portfolio's creditworthiness. As a result of this analysis, our 'B' SDR is 8.00%.

We interpolated the SDRs for rating levels between 'B' and 'AAA' in accordance with our European SME CLO criteria.

RECOVERY RATE ANALYSIS

At each liability rating level, we applied a weighted-average recovery rate (WARR) by considering observed historical recoveries. As a result of this analysis, our WARR assumptions in 'AA', 'A', and 'BBB' scenarios were 30%, 33%, and 35%, respectively.

CASH FLOW ANALYSIS

We used the portfolio balance that the servicer considered to be performing, the current weighted-average spread, and the above weighted-average recovery rates. We subjected the capital structure to various cash flow stress scenarios, incorporating different default patterns and interest rate curves, to determine the rating level, based on the available credit enhancement for each class of notes under our European SME CLO criteria.

COUNTRY RISK

Our long-term rating on the Kingdom of Spain is 'BBB'.

In our opinion, the class C notes do not have sufficient credit enhancement to withstand the sovereign default stress test. This hypothetical scenario is derived from our observation of macroeconomic conditions that occurred after several sovereign defaults where we characterize the degree of stress as "severe" in our rating definitions criteria (see "Understanding Standard & Poor's Rating Definitions," published on June 3, 2009). Therefore, under our RAS criteria, the class C notes cannot be rated above the sovereign. Taking into account the results of our credit and cash flow analysis and the application of our RAS criteria, we have raised to 'BBB (sf)' from 'BB+ (sf)' our rating on the class C notes.

In our opinion, the class A2 and B notes have sufficient credit enhancement to withstand the sovereign default stress test. Therefore, under our RAS criteria, the class A2 and B notes can be rated above the sovereign.

Since, according to our RAS criteria, SMEs have a 'moderate' sensitivity to country risk, the class A2 and B notes can be rated up to four notches above the rating on the sovereign. Taking into account the results of our credit and cash flow analysis and the application of our RAS criteria, we have raised to 'A+ (sf)' from 'BBB+ (sf)' our rating on the class B notes.

In addition, the class A2 notes meet all six of the conditions in paragraph 48 of the RAS criteria. We can therefore assign a rating up to a maximum of six notches (two additional notches of uplift) above the sovereign rating. Taking into account the results of our credit and cash flow analysis and the application of our RAS criteria, we have affirmed our 'AA (sf)' rating on the class A2 notes.

STANDARD & POOR'S 17G-7 DISCLOSURE REPORT

SEC Rule 17g-7 requires an NRSRO, for any report accompanying a credit rating

relating to an asset-backed security as defined in the Rule, to include a description of the representations, warranties, and enforcement mechanisms available to investors and a description of how they differ from the representations, warranties, and enforcement mechanisms in issuances of similar securities. The Rule applies to in-scope securities initially rated (including preliminary ratings) on or after Sept. 26, 2011.

If applicable, the Standard and Poor's 17g-7 Disclosure Report included in this credit rating report is available at <http://standardandpoorsdisclosure-17g7.com>.
