

**Rating Action: Moody's upgrades 11 notes in four MBS Bancaja Spanish RMBS Transactions**

---

Global Credit Research - 05 Sep 2014

London, 05 September 2014 -- Moody's Investors Service has today upgraded the ratings of eleven notes, confirmed the ratings of one note and affirmed the ratings of nine notes in four Spanish residential mortgage-backed securities (RMBS) transactions: MBS Bancaja 1, FTA, MBS Bancaja 2, FTA, MBS Bancaja 3, FTA and MBS Bancaja 4, FTA.

Today's rating action concludes the review of 10 notes placed on review on 17 March 2014, following the upgrade of the Spanish sovereign rating to Baa2 from Baa3 and the resulting increase of the local-currency country ceiling to A1 from A3 ([https://www.moodys.com/research/PR\\_292078](https://www.moodys.com/research/PR_292078)). The sovereign rating upgrade reflected improvements in institutional strength and reduced susceptibility to event risk associated with lower government liquidity and banking sector risks.

Please refer to the end of the Ratings Rationale section for a list of affected ratings.

**RATINGS RATIONALE**

Today's upgrade reflects (1) the increase in the Spanish local-currency country ceiling to A1 and (2) sufficiency of credit enhancement in the affected transactions.

-- Reduced Sovereign Risk

The Spanish sovereign rating was upgraded to Baa2 in February 2014, which resulted in an increase in the local-currency country ceiling to A1. The Spanish country ceiling, and therefore the maximum rating that Moody's assigns to a domestic Spanish issuer including structured finance transactions backed by Spanish receivables, is A1 (sf).

The increase of credit enhancement due to deleveraging in MBS Bancaja 1, FTA and MBS Bancaja 2, FTA and the sufficiency of credit enhancement in MBS Bancaja 3, FTA and MBS Bancaja 4, FTA combined with the reduction in sovereign risk has prompted the upgrade of the notes.

-- Key collateral assumptions

Moody's has reassessed its lifetime loss expectation taking into account the collateral performance of the transactions to date. The portfolios in MBS Bancaja 3, FTA and MBS Bancaja 4, FTA show deteriorating default growth rate. The cumulative defaults as a percentage of the original pool balance reached 3.0% versus 2.0% in December 2012 in MBS Bancaja 3, FTA and 5.0% versus 2.95% in January 2013 in MBS Bancaja 4, FTA. As a result, Moody's increased its expected loss assumption to 2.95% in MBS Bancaja 3, FTA and 4.5% in MBS Bancaja 4, FTA up from 2.6% and 3.9% of the original pool balance respectively.

Moody's review of collateral in MBS Bancaja 1, FTA and MBS Bancaja 2, FTA indicated stable performance, and the rating agency maintained its lifetime expected loss assumption at 0.6% and 1.65% of the original pool balance respectively.

-- Exposure to Counterparties

Moody's rating analysis also took into consideration the exposure to key transaction counterparties. Including the roles of servicer, account bank, and swap provider.

Today's rating action takes into account servicer commingling exposure to Bankia, S.A..

Moody's also assessed the exposure to Royal Bank of Scotland plc, Barclays Bank PLC, JPMorgan Chase Bank, NA and BNP Paribas acting as swap counterparties in each deal when revising ratings.

**PRINCIPAL METHODOLOGY**

The principal methodology used in these ratings was "Moody's Approach to Rating RMBS Using the MILAN Framework" published in March 2014. Please see the Credit Policy page on [www.moody's.com](http://www.moody's.com) for a copy of this methodology.

Factors that would lead to an upgrade or downgrade of the ratings:

Factors or circumstances that could lead to an upgrade of the ratings include (1) further reduction in sovereign risk, (2) performance of the underlying collateral that is better than Moody's expected, (3) deleveraging of the capital structure and (4) improvements in the credit quality of the transaction counterparties.

Factors or circumstances that could lead to a downgrade of the ratings include (1) an increase in sovereign risk, (2) performance of the underlying collateral that is worse than Moody's expects, (3) deterioration in the notes' available credit enhancement and (4) deterioration in the credit quality of the transaction counterparties.

## REGULATORY DISCLOSURES

For further specification of Moody's key rating assumptions and sensitivity analysis, see the sections Methodology Assumptions and Sensitivity to Assumptions of the disclosure form.

Moody's did not receive or take into account a third-party assessment on the due diligence performed regarding the underlying assets or financial instruments related to the monitoring of these transactions in the past six months.

The analysis relies on an assessment of collateral characteristics to determine the collateral loss distribution, that is, the function that correlates to an assumption about the likelihood of occurrence to each level of possible losses in the collateral. As a second step, Moody's evaluates each possible collateral loss scenario using a model that replicates the relevant structural features to derive payments and therefore the ultimate potential losses for each rated instrument. The loss a rated instrument incurs in each collateral loss scenario, weighted by assumptions about the likelihood of events in that scenario occurring, results in the expected loss of the rated instrument.

As the section on loss and cash flow analysis describes, Moody's quantitative analysis entails an evaluation of scenarios that stress factors contributing to sensitivity of ratings and take into account the likelihood of severe collateral losses or impaired cash flows. Moody's weights the impact on the rated instruments based on its assumptions of the likelihood of the events in such scenarios occurring.

For ratings issued on a program, series or category/class of debt, this announcement provides certain regulatory disclosures in relation to each rating of a subsequently issued bond or note of the same series or category/class of debt or pursuant to a program for which the ratings are derived exclusively from existing ratings in accordance with Moody's rating practices. For ratings issued on a support provider, this announcement provides certain regulatory disclosures in relation to the rating action on the support provider and in relation to each particular rating action for securities that derive their credit ratings from the support provider's credit rating. For provisional ratings, this announcement provides certain regulatory disclosures in relation to the provisional rating assigned, and in relation to a definitive rating that may be assigned subsequent to the final issuance of the debt, in each case where the transaction structure and terms have not changed prior to the assignment of the definitive rating in a manner that would have affected the rating. For further information please see the ratings tab on the issuer/entity page for the respective issuer on [www.moodys.com](http://www.moodys.com).

For any affected securities or rated entities receiving direct credit support from the primary entity(ies) of this rating action, and whose ratings may change as a result of this rating action, the associated regulatory disclosures will be those of the guarantor entity. Exceptions to this approach exist for the following disclosures, if applicable to jurisdiction: Ancillary Services, Disclosure to rated entity, Disclosure from rated entity.

Regulatory disclosures contained in this press release apply to the credit rating and, if applicable, the related rating outlook or rating review.

Please see [www.moodys.com](http://www.moodys.com) for any updates on changes to the lead rating analyst and to the Moody's legal entity that has issued the rating.

Please see the ratings tab on the issuer/entity page on [www.moodys.com](http://www.moodys.com) for additional regulatory disclosures for each credit rating.
