FITCH AFFIRMS 10 TRANCHES OF MBS BANCAJA 3 AND 4; REVISES RATING WATCH TO POSITIVE

Fitch Ratings-London-24 April 2014: Fitch Ratings has affirmed 10 tranches of MBS Bancaja 3 and 4 and removed three of them from Rating Watch Negative (RWN). The agency has also changed the Rating Watch on one tranche to Positive (RWP) from Negative.

The transactions are part of a series of Spanish prime RMBS comprising loans originated and serviced by Bankia, S.A. (BBB-/Negative/F3).

A full list of rating actions is available at the end of this commentary.

KEY RATING DRIVERS

Payment Interruption Risk Adequately Mitigated

The removal of RWN on the class A2 and B in MBS Bancaja 3 and A2 and A3 in MBS Bancaja 4 follows the introduction of dedicated cash reserves in both transactions aimed at mitigating payment interruption risk. The cash deposits are sized to cover three months of stressed senior interest, net swap payments and senior expenses. The amounts posted in these reserves are deemed sufficient to withstand Fitch's payment interruption risk stresses.

Change in Sovereign Cap

Given the sound asset performance and the strong level of credit enhancement of the class A2 of MBS Bancaja 3, Fitch has revised the Rating Watch on the notes to Positive from Negative. The action follows the recent revision of the sovereign cap on structured finance ratings to align the highest achievable ratings in Spain with the new Country Ceiling (AAsf). The notes could be upgraded to six notches above the sovereign Issuer Default Rating (BBB/Stable). Fitch expects to resolve the RWP in the next six months once it has assessed the credit enhancement underpinning the transaction.

RATING SENSITIVITIES

Deterioration in asset performance may result from economic factors, in particular the effects of growing unemployment. An increase in new defaults and associated pressure on excess spread levels and reserve funds beyond Fitch's expectations could result in negative rating actions. Furthermore, a change in Spain's Issuer Default Rating and Country Ceiling may result in a revision of the highest achievable rating.
