FITCH TAKES RATING ACTIONS ON RURALPYME 2 FTPYME, FTA

Fitch Ratings-London-12 April 2013: Fitch Ratings has upgraded Ruralpyme 2 FTPYME, FTA's class B notes and affirmed the other classes. A full list of rating actions is at the end of this comment.

KEY RATING DRIVERS

The upgrade of the class B notes reflects increased credit enhancement (CE) levels due to structural amortisation. The affirmations were driven by stable transaction performance, significant portfolio seasoning and the ability of the notes to withstand Fitch's stresses at the current rating levels.

The portfolio has amortised to 20% of its initial balance. As of February 2013, the 90+ delinquency rate increased to 9.2% of the outstanding balance from 5.4% a year ago - in absolute terms the increase is EUR2.45m. The transaction has an 18-month default definition with the 12-18 month delinquency rate currently at 2% of the outstanding balance. The senior and mezzanine tranches have sufficient credit protection against potential defaults resulting from the migration of arrears into default. The reserve fund is at the required level and can provide sufficient liquidity support to the senior notes in the event of a servicer disruption event.

The class A1 notes have paid down 97% of their initial balance and are likely to be paid in full over the next two payment dates. The structure is currently amortising sequentially.

The class D notes have been affirmed due to the limited CE available. Furthermore, the proceeds from the class D notes were used to fund the reserve fund at closing and consequently the repayment of the notes is dependent upon the level of the reserve fund at legal maturity.

The portfolio exhibits some industry concentration with 18% of the portfolio exposed to the agriculture sector and 22% exposed to real estate and construction sectors. Obligor concentration is steadily increasing with the top 10 obligors accounting for 12.9% of the portfolio. The portfolio benefits from high security coverage with 84% of the loans secured by first-lien mortgage collateral with a fairly low loan-to-value ratio of 32.6%. The transaction had an up-tick in realised recoveries with the weighted average recovery rate increasing to 53% from 30% a year ago.

RATING SENSITIVITIES

Applying a 1.25x default rate multiplier to all assets in the portfolio would not result in a downgrade for any of the notes due to CE cushions at the current rating levels.

Applying a 0.70x recovery rate multiplier to all assets in the portfolio would result in a downgrade of zero to two notches for the junior notes.

The rating actions are as follows:

EUR15.8m Class A1 notes (ISIN ES0374352005): affirmed at 'AA-sf'; Outlook Negative
EUR53.7m Class A2 (G) notes (ISIN ES0374352013): affirmed at 'AA-sf'; Outlook Negative
EUR29.1m Class B notes (ISIN ES0374352021): upgraded to 'A+sf' from 'Asf'; Outlook Stable
EUR23.2m Class C notes (ISIN ES0374352039): affirmed at 'BBsf'; Outlook Stable
EUR24.5m Class D notes (ISIN ES0374352047): affirmed at 'CCsf'; Recovery Estimate 50%
