Otra Información Relevante de BBVA CONSUMO 10 FONDO DE TITULIZACIÓN

En virtud de lo establecido en el Folleto Informativo de BBVA CONSUMO 10 FONDO DE TITULIZACIÓN (el “Fondo”) se comunica a la COMISIÓN NACIONAL DEL MERCADO DE VALORES la presente información relevante:

La Agencia de Calificación DBRS Ratings GmbH (“DBRS Morningstar”) con fecha 5 de julio de 2021, comunica que ha elevado la calificación asignada a las siguientes Series de Bonos emitidos por el Fondo:

- Serie C: A (low) (sf) (anterior BBB (high) (sf))

Asimismo, DBRS Morningstar ha confirmado la calificación asignada a las restantes Series de Bonos:

- Serie A: AA (sf)
- Serie B: AA (low) (sf)

Se adjunta la comunicación emitida por DBRS Morningstar.

Madrid, 16 de agosto de 2021.
DBRS Morningstar Upgrades and Confirms Ratings on BBVA Consumo 10 FT

CONSUMER LOANS & CREDIT CARDS

DBRS Ratings GmbH (DBRS Morningstar) took the following rating actions on the bonds issued by BBVA Consumo 10 FT (the Issuer):

-- Series A Notes confirmed at AA (sf)
-- Series B Notes confirmed at AA (low) (sf)
-- Series C Notes upgraded to A (low) (sf) from BBB (high) (sf)

The rating actions follow an annual review of the transaction and are based on the following analytical considerations:

-- Portfolio performance, in terms of delinquencies, defaults, and losses, as of the June 2021 payment date;
-- Probability of default (PD), loss given default (LGD), and expected loss assumptions on the remaining receivables;
-- Current available credit enhancement to the notes to cover the expected losses at their respective rating levels; and
-- Current economic environment and an assessment of sustainable performance, as a result of the Coronavirus Disease (COVID-19) pandemic.

The Issuer is a cash flow securitisation collateralised by a portfolio of consumer loans originated and serviced by Banco Bilbao Vizcaya Argentaria, S.A. (BBVA) to Spanish individuals to finance consumer activities. The transaction closed in July 2019 and included an 18-month revolving period which ended with the December 2020 payment date, as scheduled. As a result, the Series A Notes have been amortising since the March 2021 payment date.

PORTFOLIO PERFORMANCE
As of June 2021, loans two to three months in arrears represented 0.3% of the outstanding portfolio balance, up from 0.1% in June 2020. The 90+ days delinquency ratio was 1.8%, up from 1.0%, and the cumulative default ratio increased to 2.0% from 0.0% in the same period.

PORTFOLIO ASSUMPTIONS AND KEY DRIVERS
DBRS Morningstar conducted a loan-by-loan analysis of the remaining pool of receivables and has maintained its base case PD and LGD assumptions at 5.2% and 65.6%, respectively.

CREDIT ENHANCEMENT
As of the June 2021 payment date, credit enhancement to the Series A, Series B, and Series C Notes were 13.4%, 10.0%, and 5.1%, respectively, up from 10.0%, 7.1% and 3.0%, respectively, in June 2020. The credit enhancements to the notes increased compared with the previous annual review because of the start of the Series A Notes amortisation following the end of the revolving period in December 2020.

The transaction benefits from a reserve fund of EUR 8 million which is available to cover senior expenses and interest shortfalls on
the rated notes. The reserve fund started amortising upon the end of the revolving period and the amortisation of the Series A Notes. The reserve fund’s target balance equals 0.5% of the outstanding balance of the notes, floored at EUR 2.5 million.

BBVA acts as the account bank for the transaction. Based on the account bank’s reference rating of A (high), one notch below the DBRS Morningstar Long-Term Critical Obligations Rating of AA (low), the downgrade provisions outlined in the transaction documents, and other mitigating factors inherent in the transaction structure, DBRS Morningstar considers the risk arising from the exposure to the account bank to be consistent with the rating assigned to the Series A Notes, as described in DBRS Morningstar’s “Legal Criteria for European Structured Finance Transactions” methodology.

DBRS Morningstar analysed the transaction structure in Intex DealMaker.

The Coronavirus Disease (COVID-19) and the resulting isolation measures have caused an economic contraction, leading in some cases to increases in unemployment rates and income reductions for borrowers. DBRS Morningstar anticipates that delinquencies may continue to increase in the coming months for many structured finance transactions, some meaningfully. The ratings are based on additional analysis and, where appropriate, adjustments to expected performance as a result of the global efforts to contain the spread of the coronavirus.

For this transaction, DBRS Morningstar conducted additional sensitivity analysis to determine that the transaction benefits from sufficient liquidity support to withstand potential high levels of payment holidays in the portfolio.

On 16 April 2020, the DBRS Morningstar Sovereign group released a set of macroeconomic scenarios for the 2020–22 period in select economies. These scenarios were last updated on 18 June 2021. For details, see the following commentaries: https://www.dbrsmorningstar.com/research/380281/global-macroeconomic-scenarios-june-2021-update and https://www.dbrsmorningstar.com/research/359903/global-macroeconomic-scenarios-application-to-credit-ratings. The DBRS Morningstar analysis considered impacts consistent with the moderate scenario in the referenced reports.

ESG CONSIDERATIONS
A description of how DBRS Morningstar considers ESG factors within the DBRS Morningstar analytical framework can be found in the DBRS Morningstar Criteria: Approach to Environmental, Social, and Governance Risk Factors in Credit Ratings at: https://www.dbrsmorningstar.com/research/373262.

Notes:
All figures are in euros unless otherwise noted.
The principal methodology applicable to the ratings is the “Master European Structured Finance Surveillance Methodology” (8 February 2021).

Other methodologies referenced in this transaction are listed at the end of this press release. These may be found at: http://www.dbrsmorningstar.com/about/methodologies.

DBRS Morningstar has applied the principal methodology consistently and conducted a review of the transaction in accordance with the principal methodology.

A review of the transaction legal documents was not conducted as the legal documents have remained unchanged since the most recent rating action.

For a more detailed discussion of the sovereign risk impact on Structured Finance ratings, please refer to “Appendix C: The Impact of Sovereign Ratings on Other DBRS Morningstar Credit Ratings” of the “Global Methodology for Rating Sovereign Governments” at: https://www.dbrsmorningstar.com/research/364527/global-methodology-for-rating-sovereign-governments.

The sources of data and information used for these ratings include transaction reports provided by the management company, Europea de Titulización, S.A., S.G.F.T., and loan-level data provided by the European DataWarehouse GmbH.

DBRS Morningstar did not rely upon third-party due diligence in order to conduct its analysis.

At the time of the initial ratings, DBRS Morningstar was supplied with third-party assessments. However, this did not impact the rating analysis.

DBRS Morningstar considers the data and information available to it for the purposes of providing these ratings to be of satisfactory quality.

DBRS Morningstar does not audit or independently verify the data or information it receives in connection with the rating process.

The last rating action on this transaction took place on 9 July 2020, when DBRS Morningstar confirmed its ratings on the Series A, Series B, and Series C Notes at AA (sf), AA (low) (sf), and BBB (high) (sf), respectively.

Information regarding DBRS Morningstar ratings, including definitions, policies, and methodologies, is available at www.dbrsmorningstar.com.

To assess the impact of changing the transaction parameters on the ratings, DBRS Morningstar considered the following stress scenarios as compared with the parameters used to determine the ratings (the Base Case):

--- DBRS Morningstar expected a lifetime base case PD and LGD for the pool based on a review of the current assets. Adverse changes to asset performance may cause stresses to base case assumptions and therefore have a negative effect on credit ratings.
--- The base case PD and LGD of the current pool of loans for the Issuer are 5.2% and 65.6%, respectively.
--- The risk sensitivity overview below illustrates the ratings expected if the PD and LGD increase by a certain percentage over the base case assumption. For example, if the LGD increases by 50%, the rating of the Series A Notes would be expected to remain at AA (sf), assuming no change in the PD. If the PD increases by 50%, the rating of the Series A Notes would be expected to fall to AA (low) (sf), assuming no change in the LGD. Furthermore, if both the PD and LGD increase by 50%, the rating of the Series A Notes would be expected to fall to A (low) (sf).
Series A Notes Risk Sensitivity:
-- 25% increase in LGD, expected rating of AA (sf)
-- 50% increase in LGD, expected rating of AA (sf)
-- 25% increase in PD, expected rating of AA (sf)
-- 50% increase in PD, expected rating of AA (low) (sf)
-- 25% increase in PD and 25% increase in LGD, expected rating of A (high) (sf)
-- 25% increase in PD and 50% increase in LGD, expected rating of A (sf)
-- 50% increase in PD and 25% increase in LGD, expected rating of A (sf)
-- 50% increase in PD and 50% increase in LGD, expected rating of A (low) (sf)

Series B Notes Risk Sensitivity:
-- 25% increase in LGD, expected rating of A (high) (sf)
-- 50% increase in LGD, expected rating of A (sf)
-- 25% increase in PD, expected rating of AA (low) (sf)
-- 50% increase in PD, expected rating of A (sf)
-- 25% increase in PD and 25% increase in LGD, expected rating of A (low) (sf)
-- 25% increase in PD and 50% increase in LGD, expected rating of A (low) (sf)
-- 50% increase in PD and 25% increase in LGD, expected rating of BBB (high) (sf)
-- 50% increase in PD and 50% increase in LGD, expected rating of BBB (sf)

Series C Notes Risk Sensitivity:
-- 25% increase in LGD, expected rating of BBB (high) (sf)
-- 50% increase in LGD, expected rating of BBB (sf)
-- 25% increase in PD, expected rating of BBB (high) (sf)
-- 50% increase in PD, expected rating of BBB (sf)
-- 25% increase in PD and 25% increase in LGD, expected rating of BBB (sf)
-- 25% increase in PD and 50% increase in LGD, expected rating of BB (high) (sf)
-- 50% increase in PD and 25% increase in LGD, expected rating of BB (high) (sf)
-- 50% increase in PD and 50% increase in LGD, expected rating of BB (low) (sf)
