RATINGS RATIONALE

The rating action is prompted by the increase in credit enhancement available for the affected notes, together with the decrease in our Portfolio Credit Enhancement assumptions due to better-than-expected collateral performance. We also decreased our default probability assumption for BBVA Consumer Auto 2020-1 FT due to better-than-expected collateral performance.

Increase in Available Credit Enhancement

A non-amortizing reserve fund led to the increase in the credit enhancement available in these transactions. The transactions are currently amortizing on a pro rata basis.

For instance, the credit enhancement for the most senior note affected by today's upgrade action, the Class B Notes in BBVA Consumer Auto 2020-1 FT increased to 12.4% from 11.6% since last rating action; the credit enhancement for the most senior note affected by today's upgrade action, the Class B Notes in BBVA CONSUMER AUTO 2022-1 FONDO DE TITULIZACION increased to 11.8% from 11.5% since last rating action.

Revision of Key Collateral Assumptions

As part of the rating action, we reassessed our expected default rate and recovery rate assumptions reflecting the collateral performance to date.

For BBVA Consumer Auto 2020-1 FT, we decreased the default probability assumption to 3.5% from 4.5% based on current portfolio performance. The performance of the transaction has continued to improve since last rating action. 60 days plus arrears remained at 1.02% of current pool balance compared to 1.00% one year ago. Cumulative defaults currently stand at 2.27% of original pool balance plus all replenishments and additions compared to 2.19% one year ago.

The performance of BBVA CONSUMER AUTO 2022-1 FONDO DE TITULIZACION has been stable since the last rating action. 60 days plus arrears currently stand at 0.79% of current pool balance compared to 0.71% one year ago. Cumulative defaults currently stand at 1.91% of original pool balance plus all replenishments and additions compared to 1.72% one year ago. As a result we maintained our default probability assumption at 3.00% based on current portfolio balance.

We reassessed our Portfolio Credit Enhancement ("PCE") assumptions. PCE reflects the credit enhancement consistent with the highest rating achievable in Spain. We decreased the PCE assumption to 11% from 15% for BBVA Consumer Auto 2020-1 FT and to 11% from 14% for BBVA CONSUMER AUTO 2022-1 FONDO DE TITULIZACION.

Today's rating actions took into consideration the notes' exposure to relevant counterparties, such as servicer, account bank or swap provider as well as eligible investments for cash proceeds.

The principal methodology used in these ratings was "Moody's Global Approach to Rating Auto Loan- and Lease-Backed ABS" published in June 2025 and available at https://ratings.moodys.com/rmc-documents/445561. Alternatively, please see the Rating Methodologies page onhttps://ratings.moodys.com for a copy of this methodology.

Factors that would lead to an upgrade or downgrade of the ratings:

Factors or circumstances that could lead to an upgrade of the ratings include (1) performance of the underlying collateral that is better than we expected, (2) an increase in available credit enhancement and (3) improvements in the credit quality of the transaction counterparties.

Factors or circumstances that could lead to a downgrade of the ratings include (1) an increase in sovereign risk, (2) performance of the underlying collateral that is worse than we expected, (3) deterioration in the notes' available credit enhancement and (4) deterioration in the credit quality of the transaction counterparties.

REGULATORY DISCLOSURES

For further specification of Moody's key rating assumptions and sensitivity analysis, see the sections Methodology Assumptions and Sensitivity to Assumptions in the disclosure form. Moody's Rating Symbols and Definitions can be found on https://ratings.moodys.com/rating-definitions.

The analysis relies on an assessment of collateral characteristics to determine the collateral loss distribution, that is, the function that correlates to an assumption about the likelihood of occurrence to each level of possible losses in the collateral. As a second step, Moody's evaluates each possible collateral loss scenario using a model that replicates the relevant structural features to derive payments and therefore the ultimate potential losses for each rated instrument. The loss a rated instrument incurs in each collateral loss

scenario, weighted by assumptions about the likelihood of events in that scenario occurring, results in the expected loss of the rated instrument.

For any affected securities or rated entities receiving direct credit support/credit substitution from another entity or entities subject to a credit rating action (the supporting entity), and whose ratings may change as a result of a credit rating action as to the supporting entity, the associated regulatory disclosures will relate to the supporting entity. Exceptions to this approach may be applicable in certain jurisdictions.

For ratings issued on a program, series, category/class of debt or security, certain regulatory disclosures applicable to each rating of a subsequently issued bond or note of the same series, category/class of debt, or security, or pursuant to a program for which the ratings are derived exclusively from existing ratings, in accordance with Moody's rating practices, can be found in the most recent Credit Rating Announcement related to the same class of Credit Rating.

For provisional ratings, the Credit Rating Announcement provides certain regulatory disclosures in relation to the provisional rating assigned, and in relation to a definitive rating that may be assigned subsequent to the final issuance of the debt, in each case where the transaction structure and terms have not changed prior to the assignment of the definitive rating in a manner that would have affected the rating.

Moody's does not always publish a separate Credit Rating Announcement for each Credit Rating assigned in the Anticipated Ratings Process or Subsequent Ratings Process.

These ratings are solicited. Please refer to Moody's Policy for Designating and Assigning Unsolicited Credit Ratings available on its website https://ratings.moodys.com.

Regulatory disclosures contained in this press release apply to the credit rating and, if applicable, the related rating outlook or rating review.

The Global Scale Credit Rating(s) discussed in this Credit Rating Announcement was(were) issued by one of Moody's affiliates outside the UK and is(are) endorsed for use in the UK in accordance with the UK CRA Regulation.

Please see https://ratings.moodys.com for any updates on changes to the lead rating analyst and to the Moody's legal entity that has issued the rating.

Please see the issuer/deal page on https://ratings.moodys.com for additional regulatory disclosures for each credit rating.
