DBRS Morningstar Confirms Ratings on Two BBVA RMBS Transactions

DBRS Ratings GmbH (DBRS Morningstar) confirmed its following ratings on the notes issued by two Spanish RMBS transactions:

BBVA RMBS 5 FTA (BBVA5):
-- Series A at AA (sf)
-- Series B at A (high) (sf)
-- Series C at BBB (high) (sf)

BBVA RMBS 9 FTA (BBVA9):
-- Bonds at AA (sf)

All ratings address the timely payment of interest and ultimate payment of principal by the legal final maturity date for each transaction.

The confirmations follow an annual review of the transactions and are based on the following analytical considerations:
-- Portfolio performance, in terms of delinquencies and defaults, as of the March 2023 payment date;
-- Updated portfolio default rate (PD), loss given default (LGD), and expected loss assumptions on the outstanding collateral pools;
-- The credit enhancement available to the rated notes to cover the expected losses at their respective rating levels.

The two transactions are securitisations of Spanish prime residential mortgage loans originated and serviced by Banco Bilbao Vizcaya Argentaria, S.A. (BBVA).

PORTFOLIO PERFORMANCE
The performance of both transactions remains within DBRS Morningstar’s expectations.
-- For BBVA5, as of March 2023, loans two to three months in arrears represented 0.1% of the outstanding portfolio balance, down from 0.3% in March 2022. The 90+ day delinquency ratio was 0.3%, up from 0.2% in March 2022. The cumulative default ratio was 7.8%.
-- For BBVA9, as of March 2023, loans two to three months in arrears represented 0.2% of the outstanding portfolio balance, unchanged compared to March 2022. The 90+ day delinquency ratio was 0.2%, up from 0.1% in March 2022. The cumulative default ratio was 2.7%.

PORTFOLIO ASSUMPTIONS AND KEY DRIVERS
DBRS Morningstar conducted a loan-by-loan analysis on the remaining pools of receivables and updated its base case PD and LGD assumptions for each transaction as follows:
-- For BBVA5, DBRS Morningstar updated its PD and LGD assumptions to 2.4% and 27.4%, respectively, at the B (sf) rating level.
-- For BBVA9, DBRS Morningstar updated its PD and LGD assumptions to 1.6% and 26.4%, respectively, at the B (sf) rating level.
CREDIT ENHANCEMENT

For each transaction, credit enhancement to the rated notes is provided by subordination of junior classes and a cash reserve.

-- For BBVA5, as of the March 2023 payment date, credit enhancement to the Series A notes was 23.0%, unchanged from last year’s review because of the pro rata amortisation of the notes. Credit enhancement to the Series B and Series C notes was 13.0% and 10.0%, respectively, also stable since March 2022.

-- For BBVA9, as of the March 2023 payment date, credit enhancement to the Bonds was 33.9%, up from 31.2% at March 2022.

BBVA acts as the account bank for the two transactions. Based on the account bank reference rating of A (high) on BBVA (which is one notch below the DBRS Morningstar Long-Term Critical Obligations Rating of AA (low)), the downgrade provisions outlined in the transaction documents, and other mitigating factors inherent in the transactions’ structure, DBRS Morningstar considers the risk arising from the exposure to the account bank to be consistent with the ratings assigned to the notes, as described in DBRS Morningstar’s “Legal Criteria for European Structured Finance Transactions” methodology.

ENVIRONMENTAL, SOCIAL, GOVERNANCE CONSIDERATIONS

There were no Environmental/Social/Governance factors that had a significant or relevant effect on the credit analysis.

DBRS Morningstar analysed the transactions structures in Intex Dealmaker.

Notes:
All figures are in euros unless otherwise noted.

Other methodologies referenced in these transactions are listed at the end of this press release.

DBRS Morningstar has applied the principal methodology consistently and conducted a review of the transactions in accordance with the principal methodology.

A review of the transactions’ legal documents was not conducted as the legal documents have remained unchanged since the most recent rating action on each transaction.

The sources of data and information used for these ratings include reports and information provided by Europea de Titulización, S.A., S.G.F.T. and loan-level data provided by the European DataWarehouse GmbH.

DBRS Morningstar did not rely upon third-party due diligence in order to conduct its analysis.

At the time of the initial ratings, DBRS Morningstar was not supplied with third-party assessments. However, this did not impact the rating analysis.

DBRS Morningstar considers the data and information available to it for the purposes of providing these ratings to be of satisfactory quality.

DBRS Morningstar does not audit or independently verify the data or information it receives in connection with the rating process.

The last rating action on these transactions took place on 24 May 2022, when DBRS Morningstar confirmed the senior notes of both transactions at AA (sf), and upgraded the Series B and Series C notes for BBVA5 to A (high) (sf) and BBB (high) (sf), respectively, from BBB (high) (sf) and BB (high) (sf), respectively.

Sensitivity Analysis: To assess the impact of changing the transaction parameters on the ratings, DBRS Morningstar considered the following stress scenarios as compared with the parameters used to determine the rating (the Base Case):

-- DBRS Morningstar expected a lifetime base case PD and LGD for the pool based on a review of the current assets. Adverse changes to asset performance may cause stresses to base case assumptions and therefore have a negative effect on credit ratings.

-- For BBVA5, DBRS Morningstar updated its PD and LGD assumptions to 15.7% and 43.8%, respectively, at the AA (sf) rating level; to 12.7% and 40.3%, respectively, at the A (high) (sf) rating level; and to 8.7% and 34.2%, respectively, at the BBB (high) (sf) rating level.

-- For BBVA9, DBRS Morningstar updated its PD and LGD assumptions to 14.0% and 43.6%, respectively, at the AA (sf) rating level.

-- The Risk Sensitivity overview below illustrates the ratings expected if the PD and LGD increase by a certain percentage over the base case assumption. For example, if the LGD of BBVA5 increases by 50%, the rating of the Series A notes would be expected to remain at AA (sf), assuming no change in the PD. If the PD of BBVA5 increases by 50%, the rating of the Series A notes would be expected to remain at AA (sf), assuming no change in the LGD. Furthermore, if both the PD and LGD increase by 50%, the rating of the Series A notes would be also expected to remain at AA (sf).

BBVA5:

Series A Risk Sensitivity:

-- 25% increase in LGD, expected rating of AA (sf)
-- 50% increase in LGD, expected rating of AA (sf)
