Fitch Upgrades 3 Tranches of Rural Hipotecario RMBS

Fitch Ratings-Madrid-29 November 2018: Fitch Ratings has upgraded the class B notes' ratings of Rural Hipotecario (Rural) XIV, XV and XVI transactions, and affirmed the class A notes' ratings of Rural XIV, XV, XVI, and XVII. A full list of rating actions follows at the end of this ratings action commentary.

The transactions comprise residential mortgages originated and serviced by multiple rural savings banks in Spain that operate a back-up servicer arrangement with Banco Cooperativo Espanol S.A, (BBB/Stable/F3).

KEY RATING DRIVERS

Increasing Credit Enhancement (CE)

Today's actions reflect our view that current and projected levels of CE of the notes are sufficient to mitigate the credit and cash flow stresses under their respective rating scenarios. CE for all the securitisation notes is expected to continue increasing given their continuing sequential amortisation and the availability of non-amortising reserve funds.

Rating Cap due to Counterparty Arrangement

The class A notes' ratings of the four Rural RMBS transactions are capped at 'A+sf' as the account bank replacement triggers are set at 'BBB+' and 'F2', which are insufficient to support 'AAAsf' or 'AAAAsf' ratings. Moreover, the class B notes' ratings of Rural XIV, XV and XVI are capped at 'A+sf', which is equivalent to the SPV account bank provider's (Societe Generale S.A.) long-term deposit rating. This is because, the only source of structural CE for the class B notes is the reserve fund, which is kept at the account bank.

Stable Asset Performance

The transactions continue to show sound asset performance with three-month plus arrears (excluding defaults) as a percentage of current pool balance at less than 0.5% as of the latest reporting date. However, Fitch has been informed that the originators have repurchased some securitised loans linked to interest rate floor clauses. In line with Fitch's European RMBS Rating Criteria, the agency views the reported default data as insufficiently reliable and has therefore kept the performance adjustment factor parameter within its credit analysis at 100%.

Regional Concentration
All four transaction portfolios are exposed to substantial geographic concentration risk, mainly to the regions of Aragon, Asturias, Castilla La Mancha and Castilla-Leon. Fitch has applied a set of higher rating adjustments to the base foreclosure frequency assumption to the portion of

the portfolio that exceeds 2.5x the population within these regions.

Additionally, all the transactions have significant exposure to self-employed borrowers, ranging between 15% for Rural XVII and 23% for Rural XVI, which are considered higher-risk borrowers than dependent employees and are subject to a foreclosure frequency adjustment of 1.7x.

RATING SENSITIVITIES

A worsening of the Spanish macroeconomic environment, especially employment conditions, or an abrupt shift of interest rates could jeopardise the underlying borrowers' affordability. This could have negative rating implications, especially for junior tranches that are less protected by structural CE.

The class B notes' ratings of Rural XIV, XV and XVI are sensitive to a change to the account bank rating.

USE OF THIRD-PARTY DUE DILIGENCE PURSUANT TO RULE 17G-10

Form ABS Due Diligence-15E was not provided to, or reviewed by, Fitch in relation to this rating action.

DATA ADEQUACY

Fitch has checked the consistency and plausibility of the information it has received about the performance of the asset pools and the transactions. There were no findings that affected the rating analysis. Fitch has not reviewed the results of any third-party assessment of the asset portfolio information or conducted a review of origination files as part of its ongoing monitoring.

Fitch did not undertake a review of the information provided about the underlying asset pools ahead of the transactions' initial closing. The subsequent performance of the transactions over the years is consistent with the agency's expectations given the operating environment and Fitch is therefore satisfied that the asset pool information relied upon for its initial rating analysis was adequately reliable.

Overall, Fitch's assessment of the information relied upon for the agency's rating analysis according to its applicable rating methodologies indicates that it is adequately reliable.
