TRANSACTION SUMMARY

The static Spanish RMBS transactions comprise fully amortising residential mortgages originated and serviced by multiple rural savings banks in Spain with a back-up servicer arrangement with Banco Cooperativo Espanol, S.A. (BBB/Stable/F2).

KEY RATING DRIVERS

European RMBS Rating Criteria Updated: The rating actions reflect the update of Fitch's European RMBS Rating Criteria. The update adopted a non-indexed current loan-to-value (LTV) approach to derive the base foreclosure frequency (FF) on portfolios, instead of the original LTV approach applied before. Another relevant change under the updated criteria is the updated borrower-level recovery rate cap of 85% for Spain, lower than 100% before.

For Rural IX, the credit analysis of the portfolio remains driven by the portfolio loss floor (e.g. 5% at the 'AAA' rating case). For Rural XVII, the 'A+' rating case loss rate commensurate with the class A notes' rating has decreased to the loss floor (e.g. 2.5% at the 'A+' rating case) from 6.1%, due to long seasoning and decreasing non-indexed LTVs. For more information see "Fitch Ratings Updates European RMBS Rating Criteria; Sets FF and HPD Assumptions" dated 30 October 2024.

Stable Asset Performance Outlook: The rating actions reflect the transactions' broadly stable asset performance expectation, in line with our neutral outlook for eurozone RMBS. The transactions have a low share of loans in arrears over 90 days (at or below 0.8% of outstanding pool balance as of the latest reporting dates), a weighted average non-indexed current LTV of less than 43% and ample seasoning of the securitised portfolios of 19 and 13 years, for Rural IX and XVII, respectively.

Sufficient CE: The rating actions reflect Fitch's view that credit enhancement (CE) protection on the notes is sufficient to fully compensate the credit and cash flow stresses associated with the corresponding ratings. For Rural IX, we expect CE ratios to increase in the short term as the 10% portfolio balance triggering the mandatory sequential scheme is very close to breach (currently at 11.5% of the original portfolio balance). This is the same for Rural XVII, for which the amortisation scheme is strictly sequential.

Ratings Capped by Counterparty Risks: Rural IX's class D notes' rating is capped at the transaction account bank (TAB) provider deposit rating (Societe Generale S.A.: A-/Stable, deposit rating A) as the cash reserves held at this entity represent 100% of total structural CE for these notes. The rating cap reflects the excessive counterparty dependence on the TAB holding the cash reserves, noting that simulating the loss of these funds would imply a model-implied downgrade of 10 or more notches in accordance with Fitch's Structured Finance and Covered Bonds Counterparty Rating Criteria.

Rural XVII's maximum achievable rating remains capped at 'A+sf' due to the TAB minimum eligibility rating thresholds of 'BBB+' and 'F2', which are not compatible with 'AAsf' or 'AAAsf' rating categories as per Fitch's Structured Finance and Covered Bonds Counterparty Criteria.

RATING SENSITIVITIES

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

- Long-term asset performance deterioration, such as increased delinquencies or larger defaults, which could be driven by changes to macroeconomic conditions, interest rate increases or borrower behaviour, could lead to potential downgrades. For Rural IX, a combination of increased defaults and decreased recoveries by 15% each could trigger downgrades of up to two notches in total.

- For Rural IX's class D notes, a downgrade of the TAB provider's deposit rating, as the notes are rated at their maximum achievable rating due to excessive counterparty risk exposure.

Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

- For Rural IX's mezzanine tranche, stable to improved asset performance driven by stable delinquencies and defaults would lead to increasing CE and potentially upgrades. For instance, a combination of decreased defaults and increased recoveries by 15% each could trigger upgrades of up to one notch.

USE OF THIRD PARTY DUE DILIGENCE PURSUANT TO SEC RULE 17G -10

The principal sources of information used in the analysis are described in the Applicable Criteria.

PUBLIC RATINGS WITH CREDIT LINKAGE TO OTHER RATINGS

Rural IX's class D notes' rating is capped at the TAB's deposit rating due to excessive counterparty exposure.

ESG CONSIDERATIONS

The highest level of ESG credit relevance is a score of '3', unless otherwise disclosed in this section. A score of '3' means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. Fitch's ESG Relevance Scores are not inputs in the rating process; they are an observation on the relevance and materiality of ESG factors in the rating decision. For more information on Fitch's ESG Relevance Scores, visit <https://www.fitchratings.com/topics/esg/products#esg-relevance-scores>.

SOLICITATION STATUS

The ratings above were solicited and assigned or maintained by Fitch at the request of the rated entity/issuer or a related third party. Any exceptions follow below.

ENDORSEMENT POLICY

Fitch's international credit ratings produced outside the EU or the UK, as the case may be, are endorsed for use by regulated entities within the EU or the UK, respectively, for regulatory purposes, pursuant to the terms of the EU CRA Regulation or the UK Credit Rating Agencies (Amendment etc.) (EU Exit) Regulations 2019, as the case may be.

Fitch's approach to endorsement in the EU and the UK can be found on Fitch's [Regulatory Affairs](#) page on Fitch's website. The endorsement status of international credit ratings is provided within the entity summary page for each rated entity and in the transaction detail pages for structured finance transactions on the Fitch website. These disclosures are updated on a daily basis.
